

Project Topic

1) What kind of website would you like to build? I would like to build a business website for Blockchain UX/UI development.

2) Who would your targeted audience be for the website? My targeted audience would be small and large businesses. Businesses that wants to implement the new technology blockchain will be my main audience. Although Blockchain is relatively new, I know that there will be a great need for individuals who are knowledgeable in this area with the skill sets.

3) How have you created web sites in the past? Examples – IMM 120 projects, personal websites, websites for other people. Provide details on the topic, how many pages, what kind of navigation, if it was responsive... etc. Yes, I have created a few websites in the past using notepad. They were for class projects as well as personal projects. One project I created, was for a class that I took last year. It was an informative website for Science, Technology, Engineering, and Mathematics (STEM). It was 6 different pages with a little responsiveness. A personal project that I built was a website call PLANCK'S. It is a theoretical idea about Planck's Constant, Quantum Computing, and Quantum Intelligence. All three combining to create the future of human communications. It was 2 pages and non-responsive.

4) What kind of mobile app would you like to build? I would like to build a mobile app in conjunction with the blockchain business website.

5) Who would your targeted audience be for the mobile app? My targeted audience would still be small and large businesses with the twist to capture startups.

6) How have you created mobile applications in the past? eg – MIT App Inventor, native iOS app, native Android app, etc. Provide details on the topic, how many screens in the mobile app and their functions, what kind of navigation... etc. I have created mobile applications by using the MIT APP Inventor. I have created a storyboard, and a few games (class project). I've worked on a prayer app for the church. The above mentioned were all two screens. Navigations includes, buttons for music, new levels and text to speech.
